About me

Frontend Developer with strong analytical thinking and problem-solving skills. I focus on building responsive and accessible web applications. Eager to contribute to the team and the business by delivering high-quality, maintainable code, learning quickly, and following best practices. Looking for a full-time, long-term position where I can apply my skills, grow as a developer, and deliver valuable results consistently.

Work Experience

Junior Frontend Developer

CosmoWeb

February 2025 – November 2025

Hybrid (Office in Almaty, Remote from Prague)

A web development studio that builds landing pages, marketing websites, and web applications for small businesses and long-term partner companies.

- Helped reduce development time by contributing to an internal Minista-based starter template, building core layouts and UI components used in the company's design system and UI library.
- Created and maintained documentation for the UI library, helping developers use components in a clear and consistent way.
- Developed layouts and UI components for multi-page web applications.
- Worked on multiple client projects at the same time, meeting deadlines and keeping good quality.
- Fixed UI issues reported by QA, improving cross-browser behavior, responsiveness, and accessibility.
- Worked in Agile (Scrum and Kanban) teams, taking part in refinement, sprint planning, daily meetings, demos, and retrospectives.
- Built responsive, accessible, and semantic user interfaces following modern frontend best practices.

Education

Informatics

BSc in Computer Science

September 2022 – May 2025

Czech University of Life Sciences

Bachelor thesis: Creating responsive websites

In-depth study of responsive web design covering HTML, CSS, JavaScript techniques, layout strategies, and testing methodologies, including a comparative analysis of major CSS frameworks (Bootstrap, Tailwind CSS, Foundation) and the development and testing of a fully responsive website prototype.
